New employment position for

HYDRAULIC SERVICES DESIGNER

Junior/2 years experience

An exciting opportunity exists within an established Hydraulic Building Services Firm, for a Junior/2 years experienced Hydraulic Building Services Design Consultant.

Our company, located within the Norwest Business Park, Baulkham Hills, strives to provide our clients with a high level of current industry, technical and practical advice from project concept through to completion.

Our high level of service is achieved via a vast amount of technical professional design consulting experience and trade practical experience, as proven within numerous projects.

The position is permanent/full time, with the chance to work on a range of interesting projects, within a casual and enjoyable work environment.

Applicants must

- 1) Be enrolled with the NSW TAFE Associated Diploma in Plumbing Services
- 2) Have trade experience (completion of trade course preferred, but not essential)
- 3) 1-2 years consulting experience within an existing consultancy firm (preferred, but not essential)
- 4) Have a good understanding of Hydraulic Building (plumbing) Services
- 5) Have good computer skills including word excel and general computer applications (AutoCAD experience preferred but not essential)
- 6) Have good personal presentation skills, ability to work positively and unsupervised within a small team
- 7) Be energetic and willing to achieve

* Salary will be based & negotiated on experience of the successful applicant

* All applications will be treated as confidential
